

Technical Update

EC4-50 Connector Torque Specification

In order to reduce the amount of torque wrenches needed to install Eupen connectors in the field, it has been determined that in regards to the EC4-50 connectors, all electrical and mechanical specifications continue to be met when torque is applied in the range of 20 Nm (15 ft-lbs) to 27 Nm (20 ft-lbs). Due to this range, the TQ-34-F20 torque wrench can be used on both standard and hiflex connectors.
