***Eupen Cable announces  
the introduction of its  
new range of Plenum  
rated Coaxial Cables***

***Plenum rated Coaxial Cables***

Eupen Cable is proud to announce the introduction of its 1/2" Plenum Rated Coaxial Cable for in-building applications.

This CATVP rated coaxial cable fully meets the stringent UL-1655 Plenum cable standard, including low-flame-spread and low-smoke characteristics as laid out in NFPA-262/UL910, thus making them the ideal cable for use within traditional plenum applications, as well as ceiling spaces that are defined as "air handling space".

Available in both blue and white, the **EC4-50 PL** is a 1/2" ultra-low loss plenum rated air-dielectric coaxial cable, designed for in-building DAS plenum rated installations. Like all Eupen ultra-low-loss coaxial cables, the EC4-50 PL is manufactured and tested to Eupen's renowned standard and, in conjunction with Eupen high quality RF Connectors, is virtually PIM free.

Eupen's Range of Ultra-Low-Loss Coaxial Cables provides industry leading electrical performance and mechanical properties, supporting all wireless in-building applications.
